

UP TO 50% GRANT SUPPORT

SME COMPANIES CAN RECEIVE UP TO 50% GRANT SUPPORT FOR EVERCOMM'S CARBON REPORTING AND MANAGEMENT SOLUTIONS

Sustainability reporting is fast becoming a critical requirement for business growth—and Evercomm is here to help SMEs stay ahead.

Through the Singapore government's Productivity Solutions Grant (PSG), eligible SMEs can enjoy up to 50% funding on Evercomm's specially-packaged carbon reporting and management solutions. These solutions are designed to meet today's supply chain demands and are aligned with ISO 14064 and GHG Protocols —making this a timely opportunity for forward-thinking SMEs.

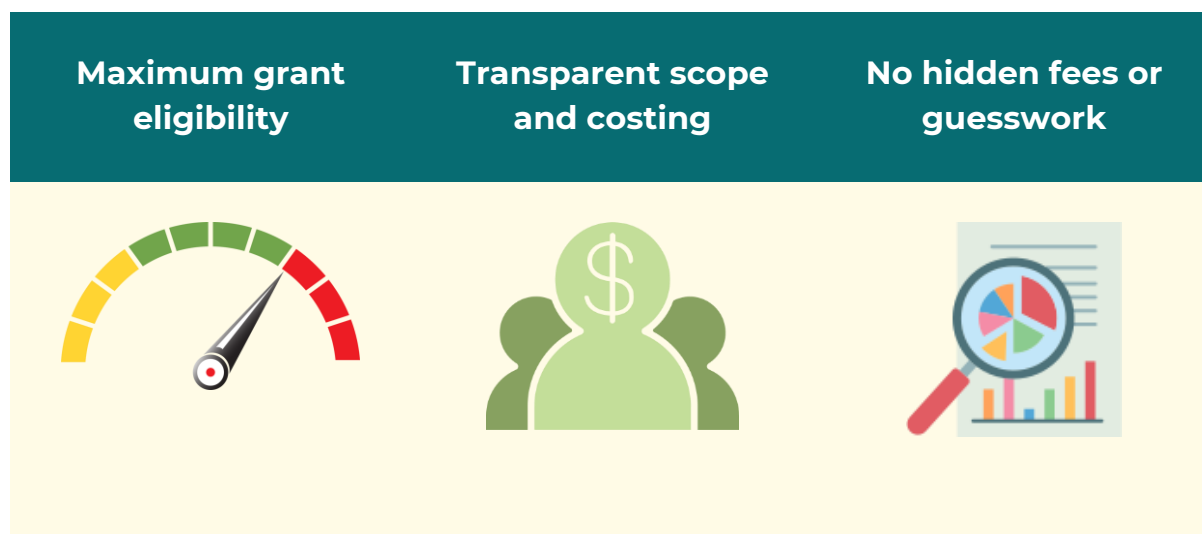

Whether it's a basic package focused on generating carbon emissions reports with third-party verification, or a more advanced solutions that includes strategic carbon reduction planning, Evercomm provides a scalable suite of services that help SMEs comply with growing reporting requirements.

Why This Matters for SMEs

As global markets like the EU, Japan, and the US tighten requirements for verified carbon emissions reporting, SMEs in Singapore - not yet bound by regulation - are increasingly required to comply as part of international supply chains. This shift means reporting isn't just a regulatory issue - **it's a business imperative.**

Purpose-Built Packages That Maximise [PSG](#) Support

Evercomm has structured its solution offerings to align with [PSG](#) grant criteria. Each package is designed to ensure:

We help SMEs make the most of government support while keeping them in full control of their sustainability journey.

Solution Performance Highlights

Our carbon management solutions are designed to meet the end-to-end needs of SMEs required to report on emissions data and sustainability plans:

			
Accurate Carbon Reporting Our software enables automated carbon emissions auditing and reporting across Scope 1, 2, and 3, fully aligned with ISO 14064 and the GHG Protocol —ensuring globally recognised, standards-based reports.	Complete ESG Reporting For SMEs that require full ESG disclosures, our platform supports key frameworks including ISSB, GRI, SGX — helping your organisation produce reports that are fully compliant and investor-ready.	Reduction Strategy & Planning For SMEs ready to take further action, Evercomm provides tools to develop an Energy and Emissions Reduction Roadmap , establishing baselines, OPEX and CAPEX simulations and other features to arrive at actionable Roadmap toward lower carbon	Bridging Expertise & Capability Gaps Lacking in-house expertise? Evercomm provides consulting, data input support, and training to help SMEs confidently manage carbon reporting in line with GHG Protocol and ISO 14064 .
